

TRANSPORTATION

NewFields has the experience, expertise and senior professional staff to assist you in effectively managing the environmental liabilities compliance process to meet your business objectives.

Our transportation-related projects have focused on environmental compliance, soil and groundwater investigations at terminal and yard facilities, design/installation/operation and optimization of remedial systems, and estimation of future environmental liabilities associated with historic contaminants. Our team of engineers, geologists, biologists, Tribal consultants, and archeologists have expertise in the following:

- Review of historic sources and releases of contaminants (Phase I ESAs)
- Remedial investigations (Phase II ESAs)
- Design and implementation of remedial programs
- Operation and optimization of remedial systems
- Estimation and reduction of future environmental liabilities
- Preparation of Spill Prevention, Control, and Countermeasures (SPCC) Plans
- Preparation of Storm Water Pollution Prevention Plans (SWPPPs)
- National Environmental Policy Act (NEPA) consultation
- Human health and ecological risk assessments

NewFields has a proven track record of developing and implementing innovative and cost-effective solutions specific to our transportation clients' needs.
